

DEVIKA YANAMALA

Barking, UK | Open to Relocation | +44 7352 683914 | devikayanamala55@gmail.com | [LinkedIn](#) | [GitHub](#)

Right to Work: UK Graduate visa - full, unrestricted right to work in the UK for 2 years following MSc graduation, no employer sponsorship required during this period; Skilled Worker eligible thereafter under new-entrant provisions.

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience using SQL, Python, and Power BI to turn business data into clear, actionable insight. Skilled in building dashboards and reports that improve decision-making, investigating and resolving data quality issues, and communicating findings to both technical and non-technical stakeholders. Comfortable working autonomously across the full analytics lifecycle, from data extraction through to stakeholder-ready reporting. Currently completing an MSc in Data Science & Artificial Intelligence at Newcastle University.

EDUCATION

MSc, Data Science & Artificial Intelligence

Expected Sep 2026

Newcastle University, Newcastle upon Tyne, UK

- UK Coursework: Data Visualisation, Machine Learning, Statistical Foundations of Data Science, Deep Learning, Image Processing, Generative AI for Business, Advanced AI, Group Project.
- Dissertation: Towards the Modelling of Traffic Flows from Open-Source Data - An Assessment of Automated OSM Topological Verification for Machine Learning-Based AADT Prediction. Built a Python pipeline (OSMnx, NetworkX) to resolve topological errors and engineer graph-theoretic centrality features, improving Random Forest and XGBoost traffic-prediction models.

Bachelor of Technology

2019 - 2023

IIIT, RGUKT, RK Valley, India - CGPA: 8.7/10

TECHNICAL EXPERTISE

- **SQL, Reporting & BI:** SQL (Spark SQL, Snowflake, PostgreSQL, MySQL, SQLite), Power BI (DAX, Data Modelling, Power Query, M Language), Tableau, Advanced Excel (Complex Formulas, Pivot Tables, Large Dataset Analysis)
- **Data Analysis & Data Quality:** Data Wrangling, Cleaning & Quality Assurance, Data Reconciliation, Exploratory Data Analysis, Trend & Root Cause Analysis, Statistical Analysis, Forecasting, Customer & Retail Segmentation, A/B Testing, Data Storytelling
- **Python & Data Modelling:** Python (Pandas, NumPy), Dimensional & Star-Schema Data Modelling, Relational Database Design, Data Pipeline Design (ETL/ELT), Data Warehousing
- **Turning Data into Business Insight:** Business Requirements Gathering, Stakeholder Collaboration, Ad Hoc Data Requests, Business Process Documentation, Client & Stakeholder Communication
- **Additional Technical Exposure:** Machine Learning (Classification, Regression, Clustering, Scikit-Learn, XGBoost, SHAP), R, TensorFlow, NLP, LLMs & Generative AI (GPT-4, Gemini, RAG), AWS, BigQuery, Docker, Streamlit, Git/GitHub, Jupyter Notebook

PROFESSIONAL EXPERIENCE

Data/AI Consultant Intern

Jun 2026 - Jul 2026

Newcastle University Industry Partner (Gut Instinct, UK)

- Elicited, documented, and validated business requirements through stakeholder discussions, translating them into structured functional specifications and process maps within a startup environment.
- Researched industry trends and evaluated a range of AI tools and platforms against stakeholder requirements, recommending scalable solutions tailored to different business functions.
- Built business cases and strategic recommendations for AI adoption, targeting operational efficiency, business growth, and process improvement.
- Presented findings and implementation strategies to business and technical stakeholders, translating analysis into clear, actionable recommendations.

Data Analyst - Product Analytics

Apr 2026 - Present

Rooted Platform - Independent Project, Remote

- Engineered a data analytics MVP in Python and SQL to ingest and analyse user behaviour, traffic patterns, and authentication data, enabling data-driven product decisions.
- Designed and automated interactive, self-service Power BI and Streamlit dashboards with advanced DAX measures, improving reporting efficiency and decision-making speed.
- Applied EDA and customer segmentation to optimise pricing strategy and surface opportunities for product and search improvements.

Data Analyst Intern

Dec 2025 - July 2026

Newcastle University - Internship, Newcastle upon Tyne, UK

- Built Python ETL pipelines to automate the collection, cleaning, validation and transformation of library occupancy data, creating a reliable dataset for downstream analysis and reporting.
- Designed and implemented a real-time KPI performance framework in Power BI to monitor department occupancy by zone, giving stakeholders clear visibility into space utilisation that directly informed decision-making on future space extension.
- Interrogated large-scale occupancy datasets using SQL and Python to identify spatial usage trends, supporting capacity planning and resource allocation.

Associate Data Scientist

May 2023 - May 2025

BEPEC Solutions - Full-Time, Bangalore, India

- Developed and deployed machine learning models (classification and regression) that improved operational efficiency by 30%, delivering measurable business impact.

- Performed feature engineering, data preprocessing, and model evaluation to enhance predictive performance and ensure robust, reliable outcomes.
- Analysed 100k+ structured records using SQL and Python to identify patterns, trends, and optimisation opportunities, supporting data-driven business decisions.
- Translated cross-functional business requirements into analytical solutions, dashboards and reports, giving stakeholders clearer evidence to support operational decision-making.

Data Scientist Intern

Jan 2023 - May 2023

BEPEC Solutions - Internship, Bangalore, India

- Conducted exploratory data analysis and preprocessing (imputation, encoding, scaling), improving forecasting accuracy by 15% by resolving data quality issues upstream.
- Created dynamic Power BI and Excel dashboards to track historical performance metrics, supporting resource planning and department scheduling.
- Designed and implemented end-to-end data workflows from ingestion through model deployment and reporting.

SELECTED PROJECTS & INITIATIVES

Commercial Opportunities Analytics Dashboard (Retail)

Personal Project | [GitHub](#)

- Built a star-schema data model in Python (Pandas) to clean, transform, and unify raw transactional sales data across 15 European markets into a single analytical model.
- Developed a dashboard with 20+ advanced DAX measures (time intelligence, segment grouping) to track key retail metrics.
- Analysed pricing and customer segments to identify discount optimisation opportunities, projected to recover £150K+ in annual profit.

Pharmaceutical Marketing Strategy & Attribution Analysis

Personal Project | [GitHub](#)

- Built a regression-based marketing attribution model in Python to estimate the commercial impact and ROI of three campaign strategies.
- Applied Interrupted Time Series (ITS) analysis and statistical testing to evaluate competitor market entry and predict sales deceleration.
- Designed an interactive Power BI strategy simulator with DAX what-if parameters, identifying high-impact channels and modelling \$1.3B+ in attributed revenue.

Next Best Action & Churn Prediction Model (Banking)

Personal Project | [GitHub](#)

- Developed an end-to-end machine learning pipeline in Python (Scikit-Learn, Imbalanced-Learn) to predict customer churn, addressing class imbalance with SMOTE.
- Engineered a Next Best Action recommendation framework mapping customer transaction patterns to tailored retention products, reducing manual review effort.
- Applied SHAP to ensure model transparency and explainability, aligning with UK banking regulatory expectations.

HACKATHONS & INNOVATION PROJECTS

AI-Powered Smart Spending Assistant

Jul 2026

Accenture × Newcastle University AI Hackathon

- Collaborated in a multidisciplinary team to design and prompt-engineer an AI-powered Smart Spending Assistant that extracted and auto-categorised receipt data using AI.
- Analysed spending patterns to generate personalised financial insights and recommendations.
- Applied data analytics, AI concepts, and rapid prototyping to deliver a proof-of-concept within a limited timeframe, presenting the solution and its business value to industry and academic stakeholders.

ClearHead - AI Student Burnout Prediction Platform

Jun 2026

Founders Club AI Mini Hackathon

- Designed and prototyped an AI-powered student wellbeing and burnout-prediction solution within a 60-minute hackathon sprint.
- Modelled burnout risk using sleep patterns, stress indicators, study habits, and lifestyle behaviours, and designed personalised recommendation workflows.
- Delivered a live pitch demonstrating product thinking and AI-assisted problem-solving to judges and peers.

PROFESSIONAL CERTIFICATIONS

UK Work Culture Programme (Awarded Participant)

2026

Newcastle University Professional Development Programme

- Selected for a competitive programme focused on UK industry standards, workplace culture, and corporate communication.
- Collaborated in a team to design and pitch an AI-assisted MVP to industry professionals, presenting business solutions and receiving feedback.
- Built strong teamwork, problem-solving, and stakeholder communication skills in a fast-paced, professional environment.

ADDITIONAL EXPERIENCE & RECOGNITION

Global Ambassador

May 2023 - Present

WomenTech Network - Volunteering Leadership Role

- Contributed to global initiatives promoting technical excellence, leadership, and diversity in AI and Data Science.

Volunteer Module Representative

May 2026

Newcastle University - Elected Student Leadership Role

- Elected to represent the MSc cohort; partnered directly with faculty to optimise curriculum delivery and the student experience.
