PROFESSIONAL SUMMARY

Results-driven Data Analyst with 2+ years of commercial experience in the UK and India. Proven ability to translate complex datasets into actionable business strategies using SQL, Python, and Power BI. Adept at automating reporting pipelines, building interactive stakeholder dashboards, and driving data-informed decision-making.

TECHNICAL SKILLS

- Core Analytics: Exploratory Data Analysis (EDA), Statistical Analysis, Data Wrangling, Predictive Analytics
- Tools & BI: Power BI, Tableau, SQL, Excel, Git, Jupyter, VS Code
- Programming: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), R, HTML/CSS
- Cloud & Deployment: AWS (EC2, S3), Flask, Render

WORK EXPERIENCE

Data Analyst (Studentship) | Newcastle University, UK | 01/2026 – Present

- Conducted advanced data analysis using SQL and Python to identify usage patterns across smartcard and occupancy datasets, directly supporting strategic resource allocation decisions.
- Designed and deployed interactive Power BI dashboards, translating complex backend datasets into clear, operational insights for non-technical stakeholders.
- Collaborated cross-functionally with library management teams to establish structured data governance practices, improving overall data accessibility.

Associate Data Scientist / Analyst | BEPEC Solutions, Bangalore, India | 05/2023 – 05/2025

- Automated manual reporting pipelines and built dynamic business intelligence dashboards, improving overall reporting efficiency by 30% and saving 10+ hours per week.
- Led end-to-end data projects, partnering directly with stakeholders to align analytics deliverables with core business requirements.
- Developed scalable predictive models and automated workflows using Python and AWS, significantly enhancing data processing efficiency and decision reliability.

Data Analytics Intern | BEPEC Solutions, Bangalore, India | 01/2023 – 05/2023

- Performed exploratory data analysis (EDA) to uncover market trends, directly supporting data-driven business decisions.
- Created compelling visual reports and dashboards to present complex findings to senior management.
- Assisted in the validation of predictive models, contributing to a 15% improvement in forecasting accuracy.

KEY DATA PROJECTS

Commercial Opportunities Analytics Dashboard (Retail) | Power BI, DAX, Python

- Partnered with Sales Leadership to identify high-margin growth opportunities across 15 European markets by analyzing 4 years of transactional data (8,000+ records).
- Engineered a robust Star Schema data model using Python (Pandas) to clean raw data and prepare optimized Fact and Dimension tables for BI ingestion.

- Developed an executive Power BI dashboard with 20+ advanced DAX measures, proving that capping customer discounts at 15% and expanding the Corporate segment could recover over £150K in annual profit.

Customer Sales Prediction & Segmentation | Python, Scikit-Learn, Power BI

- Developed predictive models (Random Forest) to forecast customer purchase behavior, improving targeted marketing strategies and increasing conversion rates by 20%.
- Identified key sales drivers through feature importance techniques and visualized customer segments in interactive dashboards for business stakeholders.

EDUCATION

Master of Science (MSc), Data Science & Artificial Intelligence | Expected 09/2026

Newcastle University, UK

Modules: Data Visualisation, Machine Learning, Statistical Foundations of Data Science

Bachelor of Technology (BTech) | 2019 – 2023

IIIT, RGUKT, RK Valley, India (CGPA: 8.7/10)
