

DEVIKA YANAMALA

Newcastle, UK (Open to London Relocation) | devikayanamala55@gmail.com | +44 7352683914 | LinkedIn | Github

PROFESSIONAL SUMMARY

Data Scientist (MSc Data Science & AI) with 2+ years building and deploying production ML systems across structured data, free text, and documents. End-to-end experience spanning data engineering, model development, and client-facing delivery of results in high-stakes environments.

TECHNICAL SKILLS

- AI & Model Development: Machine Learning (classification, regression, anomaly detection), NLP, LLMs, RAG Pipelines, Python (Pandas, NumPy, PyTorch, scikit-learn), structured data, free text, documents, images.
- Full-Stack & Product Analytics: SQL, PostgreSQL, Elasticsearch, Data Pipelines, React, TypeScript, Power BI, Advanced Excel, EDA.
- Engineering & Ops: Git, APIs, Model Validation, Production Deployment, Agile, Python scripting, C# (familiar).

PROFESSIONAL EXPERIENCE

Data Analyst – Product Analytics | Rooted Platform | Independent Project | 04/2026 – Present

- Built and deployed a production Python/SQL pipeline to ingest and process user behaviour data end-to-end, integrating ML-driven insights to automate business workflows and inform product strategy.

Data Analyst (Studentship) | Newcastle University, UK | 01/2026 – Present

- Engineered automated Python data pipelines from raw client extracts to structured data stores, guaranteeing 100% data integrity and enabling reliable downstream reporting and modelling.
- Presented technical findings and model outputs to non-technical stakeholders, translating complex analytical results into clear, actionable recommendations and roadmap decisions.

Associate Data Scientist | BEPEC Solutions, Bangalore, India | 05/2023 – 05/2025

- Developed, tuned, and deployed production-grade machine learning models in Python to detect complex patterns in business data, improving operational efficiency by 30% and running reliably in live environments.
- Worked in cross-functional Agile teams with data engineers and product stakeholders; conducted client-facing meetings to gather requirements, define model scope, and present analytical findings.

Data Scientist Intern | BEPEC Solutions, Bangalore, India | 01/2023 – 05/2023

- Performed EDA and data preprocessing on large-scale structured datasets, contributing to a 15% improvement in forecasting accuracy by identifying and resolving data quality issues upstream of modelling.

KEY PROJECTS

Next Best Action & Customer Churn Prediction Engine (Banking) | Python, XGBoost, SHAP [Projectlink]

- Fraud-Adjacent Classification: Developed a high-performance churn classification model using XGBoost with stratified splits and hyperparameter tuning on imbalanced financial datasets; applied SHAP for explainability.
- Recommendation Engine: Engineered a next-best-action system assigning customer personas from transaction data to automate targeted interventions, reducing manual review overhead.

MSc Dissertation: Environmental Noise & Traffic Flow Modelling (In Progress) | Python, GIS (GeoPandas, OSMnx)

- Environmental Impact: Engineered a Python pipeline to process open-source spatial datasets and road networks to model traffic flow and predict environmental noise levels.

- Advanced Analytics: Trained and validated Random Forest and Gradient Boosting models, presenting key metrics to stakeholders to guide local environmental planning.

EDUCATION

Master of Science (MSc), Data Science & Artificial Intelligence | Expected 09/2026

Newcastle University, Newcastle upon Tyne, UK

Bachelor of Technology | 2019 – 2023

IIIT, RGUKT, RK Valley, India (CGPA: 8.7/10)

CERTIFICATIONS & ACHIEVEMENTS

UK Work Culture Programme (Awarded Participant) | Newcastle University

- Selected for a competitive programme solving live UK business challenges and presenting actionable solutions to corporate stakeholders.

LEADERSHIP & VOLUNTEERING

- Global Ambassador | WomenTech Network: Active participant in global initiatives promoting technical excellence, leadership, and diversity in AI and Data Science.
- Volunteer Module Representative | Newcastle University: Elected to represent the MSc cohort, dedicating time to collaborate directly with faculty to optimize curriculum delivery and the student experience.
